Intro

Intro Workshop #2

Follow-up, user test planning and mock-up

EXPECTATIONS

Today's program

PROGRAM

- Follow-up on user research
- How to design user tests
- Design your own user test
- Intro to MakerSpace
- Make mock-ups
- What's next?

GOD FORNØJELSE!

NORDISK FILM
BIOGRAFER

Malene Tofveson Nibe

MakerSpace Manager & Design Engineer

manib@sdu.dk

Helps students and startups with:

- Idea and prototype development
- Product development
- Production methods
- Ideation
- User tests
- Visual identity
- Logo design, etc.

Previously:

- Robot industry
- Interior Design
- My own startup

User research - what did you learn?

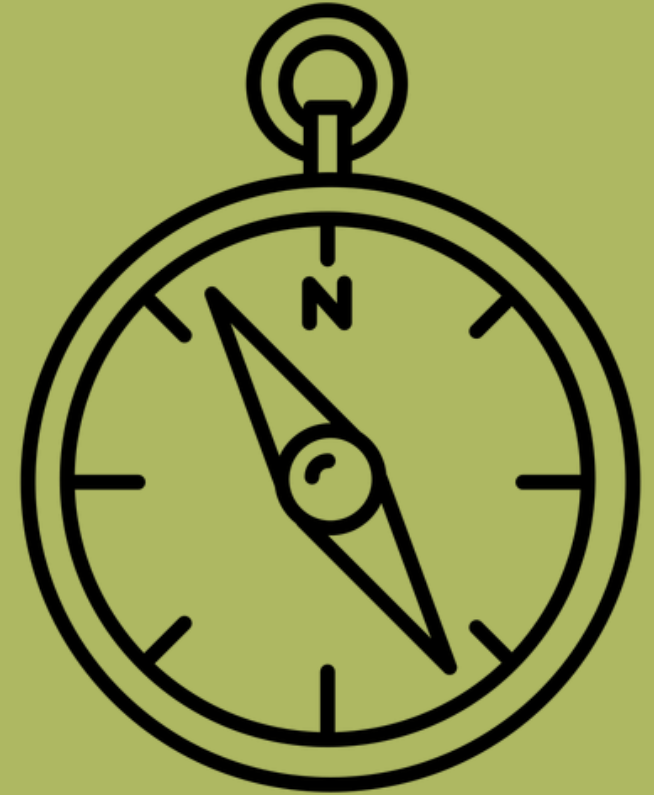

Two people together:

1. Short presentation of your idea
2. What did you learn from your user research?
 - About your customers?
 - About their problems?

HOW TO (USER) TEST

Feedback is the
compass for
improvement.

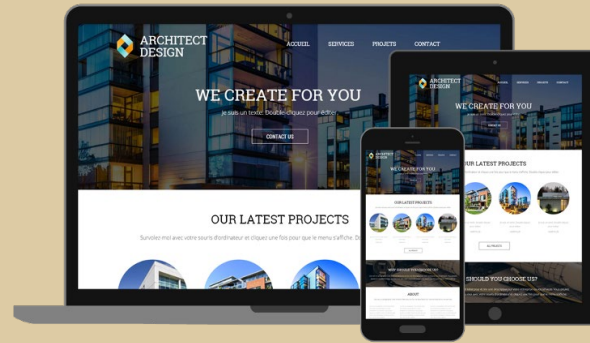

User testing for...

Hardware

- Design
- Functionalities
- Price

Software

- User flow
- Features
- Revenue stream

Service

- User journey
- Which parts of the service is most relevant?

Service

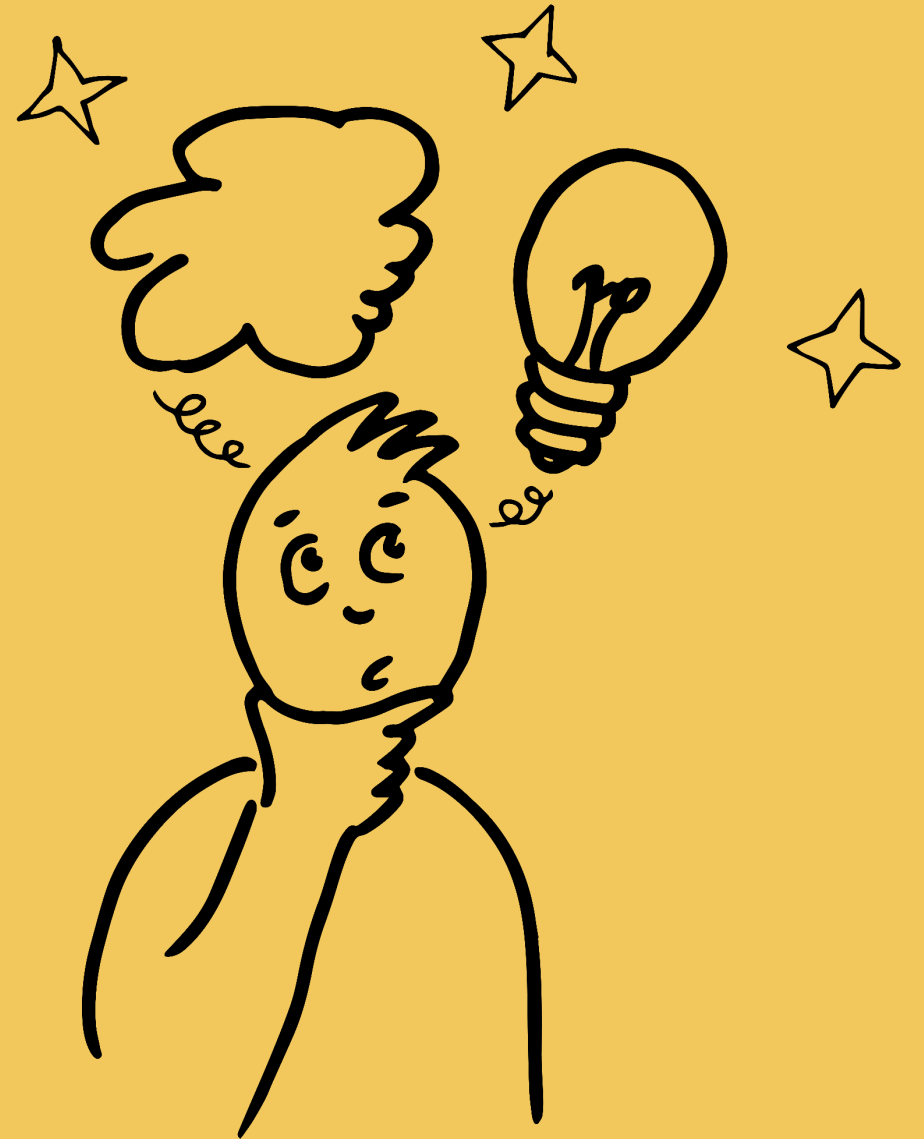

You are the product!

What tasks can you solve?

What motivates you?

Who are your customers?

What do they want?

[Ydelser](#)[Om os](#)[Viden & Inspiration](#)[Skriv til os](#)

Drossel Kommunikation

Ordentligt, personligt, professionelt

Vi er et lille, agilt hold, der fungerer som din eksterne kommunikationsafdeling. Vi har solide kompetencer inden for skriftlig, mundtlig og visuel kommunikation. Vi tager os af hele processen fra start til slut og sikrer, at dit budskab kommer stærkt ud i verden.

Komplet ladeløsning til virksomheder, kommuner og boligforeninger

Skriv til os

Grafisk design

Vi kan stå for at designe og opsætte præsentations- og salgsmateriale, ESG-rapporter eller lave indhold til sociale medier, m.m.

Læs mere

Tekstforfatning

Vi skriver de fleste former for tekster, herunder artikler, nyhedsbreve, tekster til hjemmeside, sociale medier eller præsentations- og salgsmateriale.

Læs mere

Retorisk rådgivning

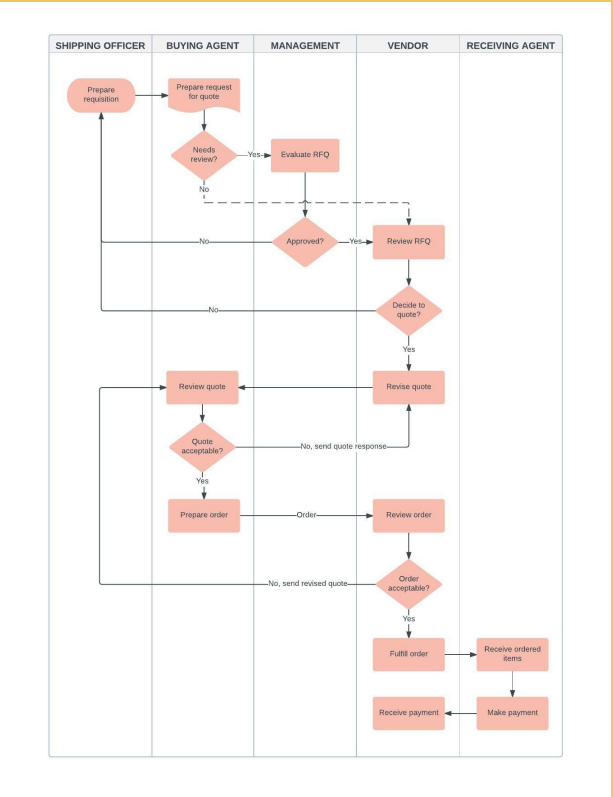

Vi rådgiver i kommunikationsstrategier, tale og medietræning, så du helt skarpt kan pitche for kunder, holde taler eller lave præsentationer.

A lesson plan

DAILY LESSON PLAN		
NAME OF COURSE: E1	NAME OF INSTRUCTOR(S):	
UNIT NAME: Independent Reading	DATE:	
UN/ESSENTIAL QUESTION: How can we use independent reading to improve as readers and writers?		
At the end of this lesson, students will: At the end of this lesson, students will: At the end of this lesson, students will:		
KNOW: How to access and use Animoto.	BE ABLE TO: Respond to a piece of literature using Animoto.	THINK ABOUT: Using Animoto to evaluate and synthesize their knowledge.
FOCUS QUESTION/OBJECTIVE: How can we use Animoto to help us respond to literature?		
MATERIALS	- Class set of laptops - Class set of short story, "Blah blah blah," which students should have read for homework. - Handouts on using Animoto - Assignment sheet for daily assignment homework	
DO NOW	Who was your favorite character in the short story "Blah blah blah"? Why was that person your favorite character?	
MINI-LESSON	Animoto is a website that you can use to create video slide shows. This will be a great way for you to do your book projects! Today, we are going to practice using Animoto to respond to literature with your homework story, "Blah blah blah."	
ACTIVITY	When you are making your video, you need to respond to two of these three questions: 1. Explain why your favorite character was your favorite character. 2. What was the conflict in the story? Explain why the conflict occurred. 3. If you could re-write the ending to the story, what would it be? Why?	
SUMMARY	Walking through how to use Animoto with the handout, logging on will be accomplished as a whole class. Actually creating an Animoto will be done individually.	
HOMEWORK	Students explain how they will use Animoto.

New design based on user inputs

Hardware

Hardware mock-ups

What we need to...

BUILD

to support our tests and
visualize our idea

What we want to...

LEARN

How we will...

MEASURE

by planning the tests

Design your user tests

1. Make a mind map (8 min)
2. Select the most critical test (2 min)
3. Fill out your test card (10 min)
4. Plan your test (30 min)

Test Card Strategyzer

Test Name: _____ Deadline: _____

Assigned to: _____ Duration: _____

STEP 1: HYPOTHESIS
We believe that _____

STEP 2: TEST
To verify that, we will _____

STEP 3: METRIC
And measure _____

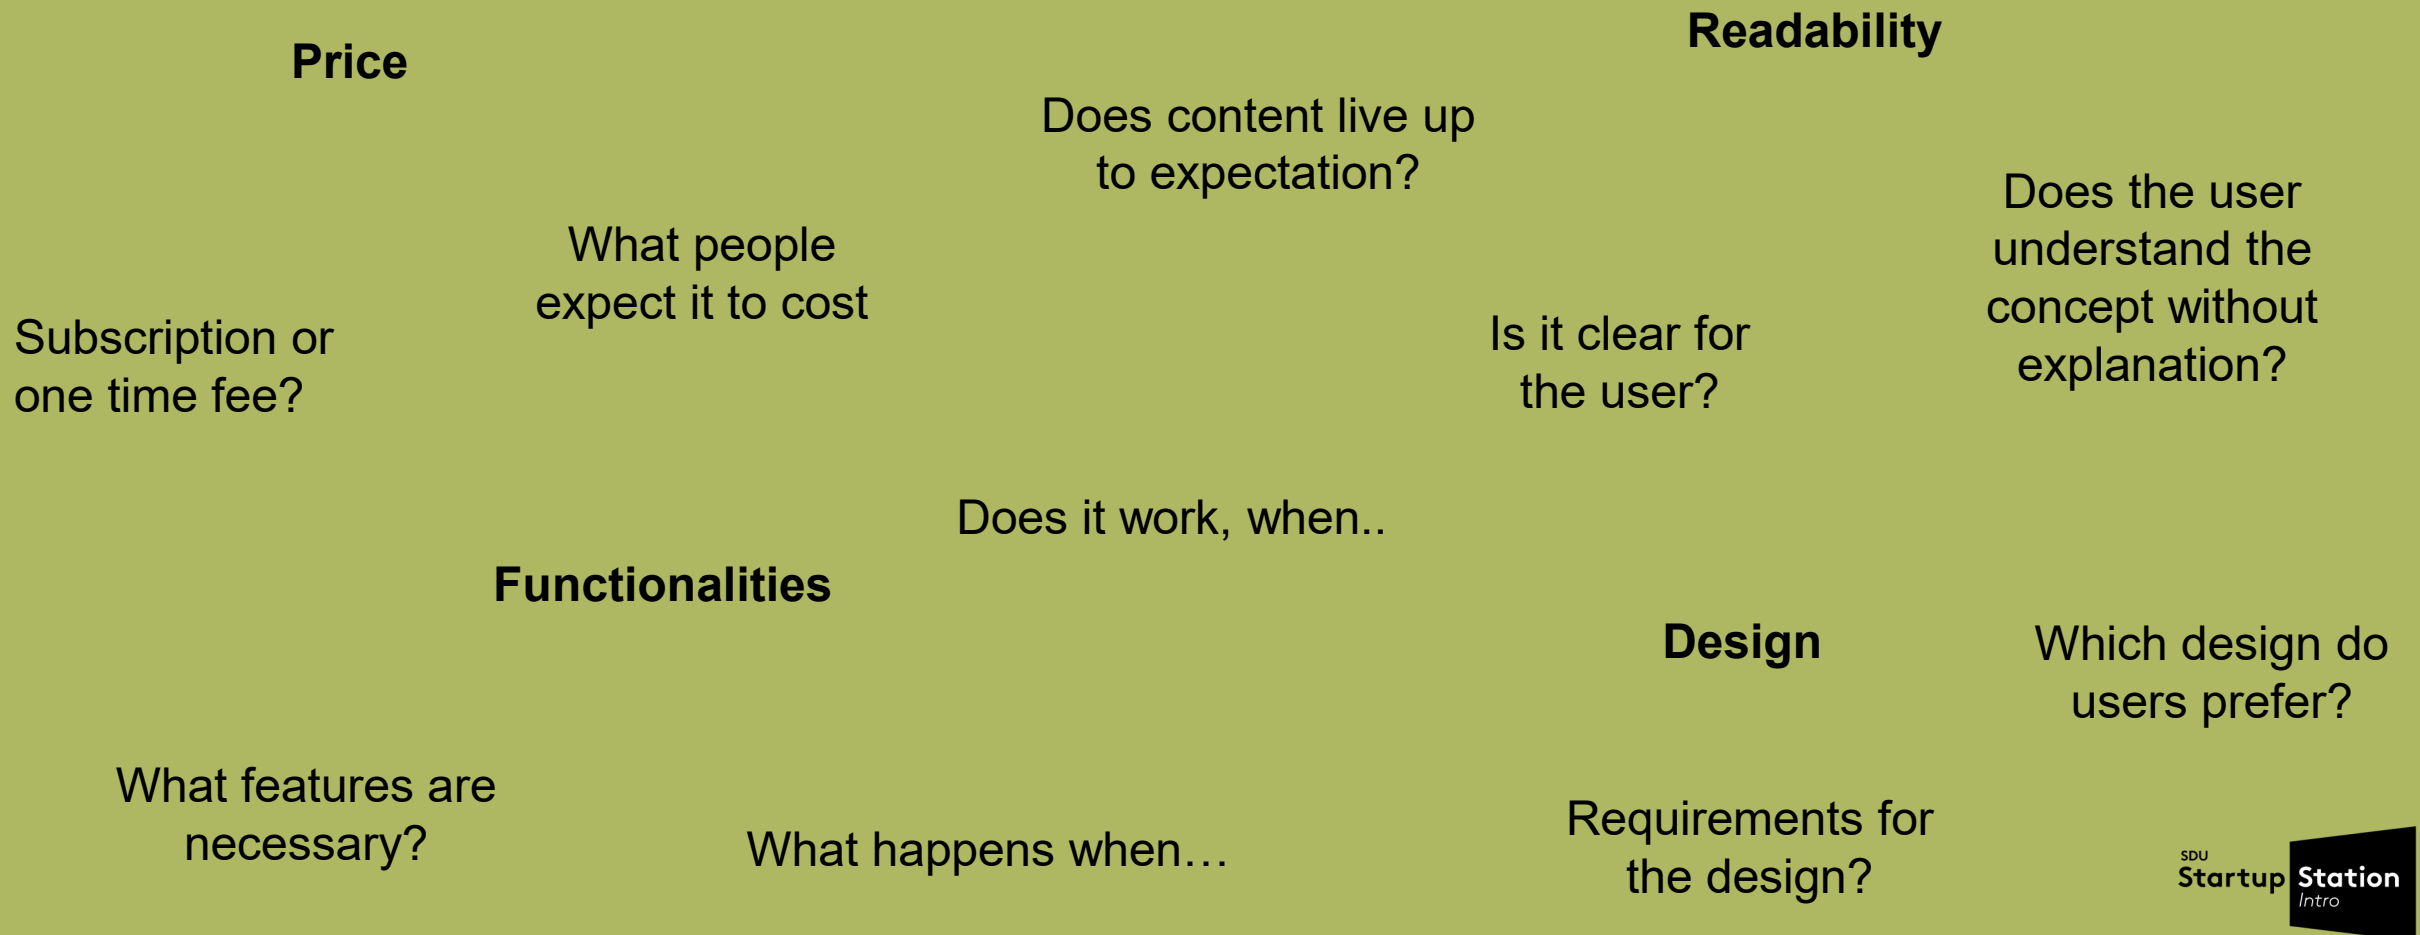

STEP 4: CRITERIA
We are right if _____

Test Cost: _____ Data Reliability: _____

Time Required: _____

Make a mind map of what you want to learn.

(8 min)

**Select the most
critical aspect
to learn about
your idea**

Fill out the test card on how to perform your user test (10 min)

Test Card

Test Name	Deadline
Assigned to	Duration

STEP 1: HYPOTHESIS

We believe that

There is a need for an app that can create social connections between elder and young lonely people

Critical: 

STEP 2: TEST

To verify that, we will

Create a paper prototype of the app and test with both 10 young and 10 elderly people.

Test Cost:  Data Reliability: 

STEP 3: METRIC

And measure

1. How many feel lonely
2. How many would like to use our app for creating new social relations

Time Required: 

STEP 4: CRITERIA

We are right if

6 out of 10 people who feel lonely would like to use the app

The planning...

How will you perform the user test?

(15 min)

User test planning

What do you want to test?

Which type of user test?

Why?

How do you reach your target customer?

User tests should be done with test persons as close as possible to your target customer.

How many do you want to test with? - **At least 10 or 3 target customers, remember!**

Number of tests: _____

Where & when?

When will you perform the test?

... and where? (try to put yourself into the user's perspective and find a place that's suits the user)

How do you approach your test person?

- Do you need a medium to get in touch with your target customer?
- What is your starting line when approaching your target customer?
- How are you dressed?

How do you perform the user test?

Important tips:

- Ask open-ended questions like: What do you think... What is your expected...
- Make it clear for the test persons that they cannot do or say anything wrong.
- Remember to video tape or have one person dedicated to take notes (ask for permission to film)
- Let them know, that you're here to learn from them and not to sell something.
- Listen and observe 80% of the time and ask questions 20% of the time.

Practicalities:

What do you need to prepare?

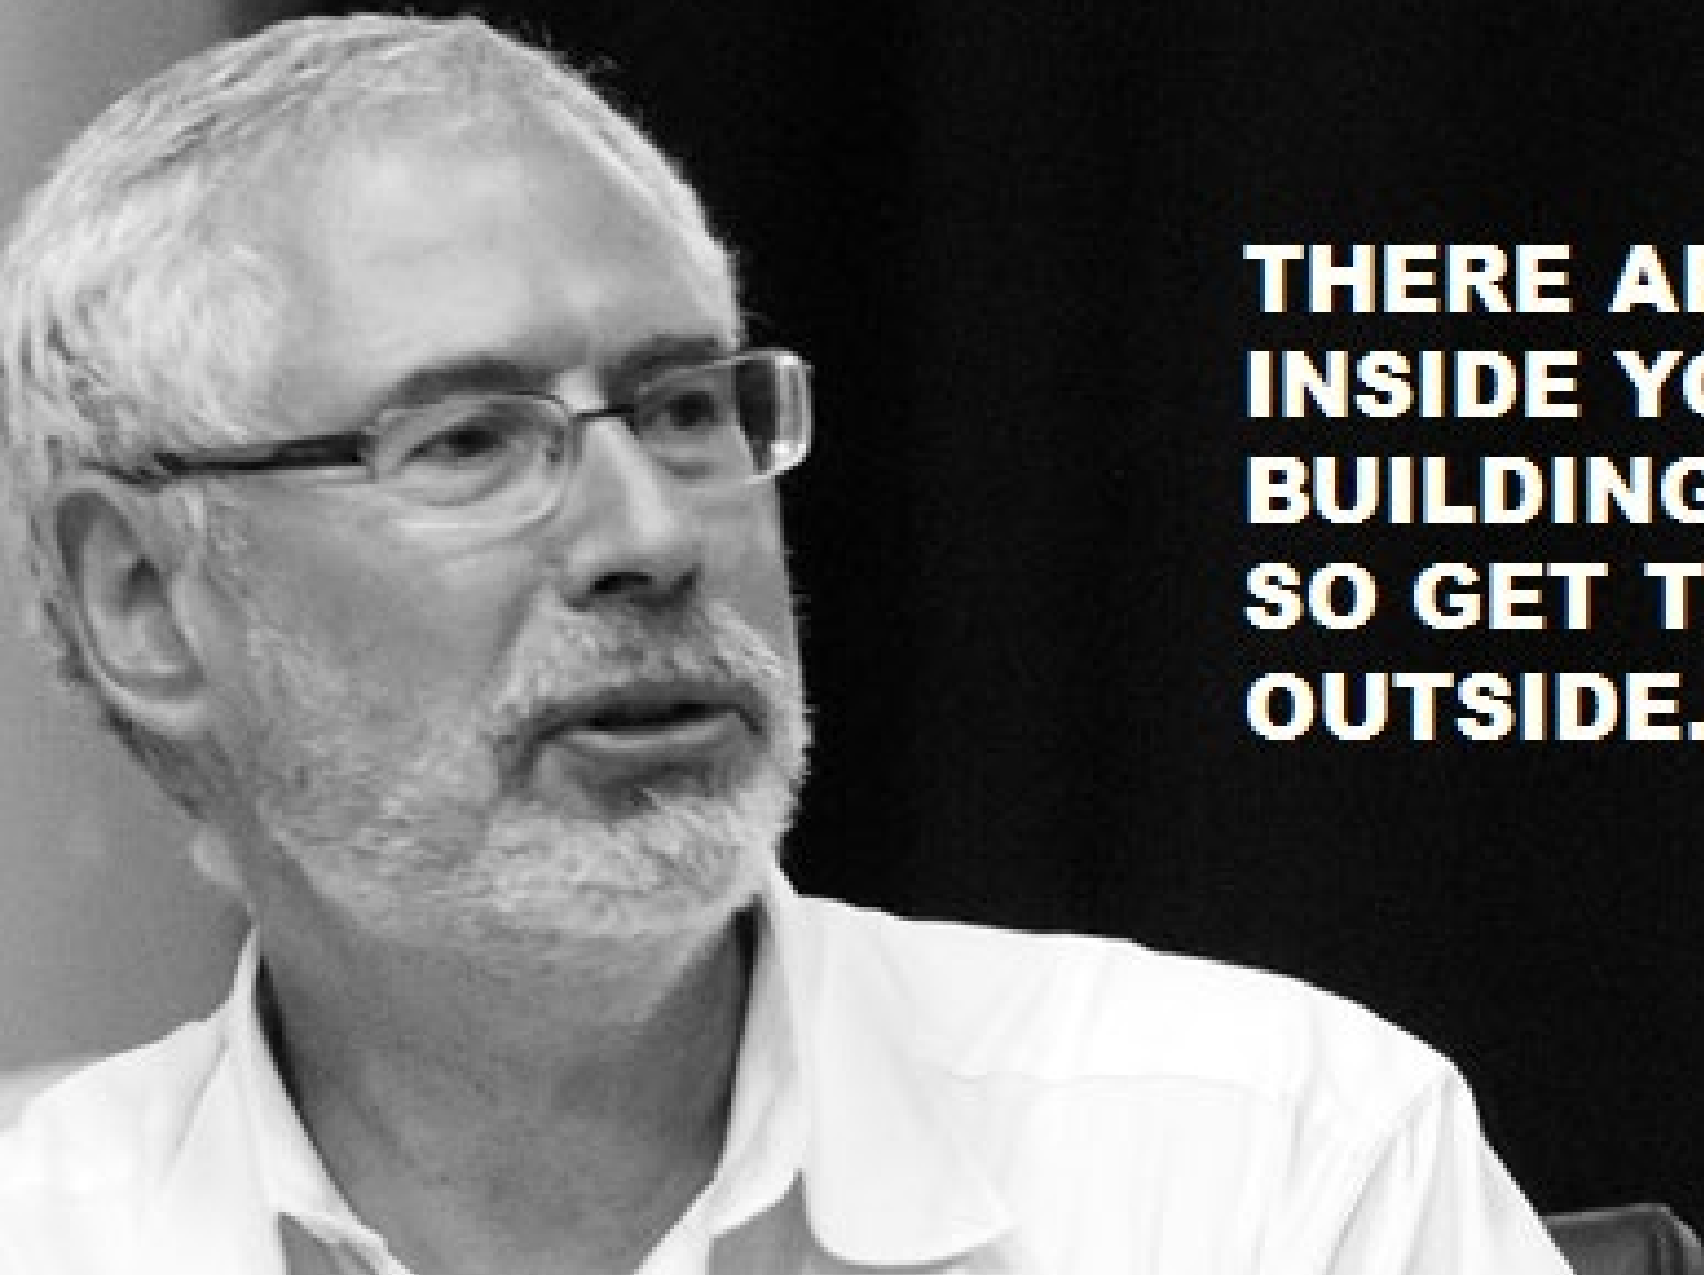

Who does what? Clear the roles beforehand: instructor, time keeper, notes, camera man, etc.

Which things do you need to support your test or visualization of your idea/concept? Mock-ups? Other physical objects that support you or the user?

Outcome do you expect?

Present your test to another startup (10 min)

MAKERS SPACE

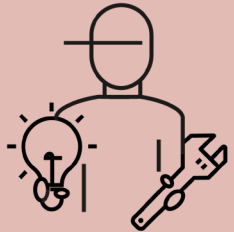

The image shows a horizontal banner with the text "MAKERS SPACE" in large, stylized, 3D letters. The letters are mounted on a white strip against a dark teal background. Each letter is uniquely designed with various patterns, colors, and textures. The 'M' is white and illuminated from within. The 'A' is orange and blue with a puzzle piece design. The 'K' is made of thin blue lines. The 'E' is solid orange. The 'R' is white with a brown pattern of small figures. The 'S' is white with a blue and yellow geometric pattern. The 'P' is black with white hexagonal patterns. The 'A' is multi-colored with a rainbow-like gradient. The 'C' is white with a brown pattern of small circles. The 'E' is dark blue with white patterns.
