

Feedforward for exam

Lecture 3

Mr. Bean Takes an Exam

Group assignment

Consists of 2 parts

- Technical report → assignment created on Itslearning
- Pitch → assignment created on Itslearning

Technical report

- Only write material very specific to your industrial use-case.
- Each member of the team shall clearly state their contribution in the developing the solution for the use-case.
- The report shall be developed in parallel with the lab work to help the thinking and feedback process.

Pitch

- Think like a startup is trying to attract investors to put their money into your idea.
- A startup can be a new enterprise, or it can also be a new product within an enterprise.

Exam requirements

Presentation of the solution

- Present your solution including a video of the demonstration. Use technical report and pitch as the basis. Presentation time between 12-15 minutes. No template will be provided, so you are free to decide.

Oral exam

- Oral exam will be individual based on the contributions in technical report and pitch.
- Grading will be done based on the amount of contribution and the depth of knowledge on the subject.

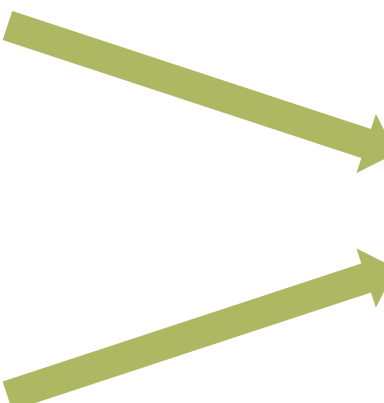

Exam Rules

- The schedule of the exam is fixed and any change can only be applied via SDU's study board and they seems to be very strict on making any change.
- All students are required to participate in person, physically in the exam. Remote participation needs to be approved by the SDU's study board and they seems to be very strict on such approvals.

Grading scheme

Engineering of Innovative Technologies			
Item	Score	Weight	Total
Technical report	0	40%	0
Pitch	0	10%	
Presentation	0	10%	
Oral exam	0	40%	

PiR (Project in Robotics)			
Item	Score	Weight	Total
Technical report	0	50%	0
Presentation	0	10%	
Oral exam	0	40%	

Score	Grade
0 to < 2.5	00
2.5 to < 3	2
3 to < 3.5	4
3.5 to < 4	7
4 to < 4.5	10
4.5 to 5	12

Grading Rules

- Any single missing item (Technical report, Pitch (not for PiR students), Presentation, Oral exam) will automatically result in grade 00.
- A minimum 50% threshold must be scored for each item (Technical report, Pitch (not for PiR students), Presentation, Oral exam). Otherwise, the item will be marked missing.
- -3 grade can be given in exceptional cases, such as plagiarism, using AI generated text without explicit mention or violating other university rules.

Grading criteria

	Criteria	Description	Score range
Technical report	Description of the industrial challenge	It is clear what is the industrial challenge and why it is important to solve this industrial challenge.	0-5
	State of the art	Report describes the most recent and relevant research and developments related to the industrial challenge with appropriate number of references.	
	Approach	Report clearly describes how the presented solution is different and better.	
	Experimental prototype	The experimental prototype is clearly described and it adequate for testing the approach.	
	Results	Reports clearly shows the completion of the experiment and provides measureable results from the experiments.	
	Summary	The report is well summarized in the Abstract. Conclusion clearly shows the success and shortcomings of the approach and describes the future direction.	

Scoring guide	
Description	Score
Missing	0
Not missing	1
Poor	2
Good	3
Very good	4
Excellent	5

Grading criteria

	Criteria	Description	Score range
Pitch	Innovativeness of the solution	Slides demonstrates the understanding of the topics and show clear connection with the industrial challenge	0-5
	Clarity of the business model		
	Market identification		
	Market assessment		
	Customer feedback		
	Competition identification		
	Business plan		
	Financial plan		

Grading criteria (Examination Day)

		Criteria	Description	Score range
Examination day	Presentation	Industrial challenge and approach	Industrial challenge is explained. The differentiation of the approach is clearly shown as compared to the current state-of-the-art	0-5
		Technical prototype	The technical prototype was clearly presented with the results obtained through experiments	
		Business development	The business model and development strategy is presented.	
	Oral exam	Technical prototype	The student shows good knowledge of technical prototype and it is clear that student has actively engaged in the development of prototype	0-5
		Business development	The student shows good knowledge on the subjects of business development and it is clear that student has actively engaged in the business development activities	

Grading criteria - PiR

		Criteria	Description	Score range
Examination day	Presentation	Industrial challenge and approach	Industrial challenge is explained. The differentiation of the approach is clearly shown as compared to the current state-of-the-art	0-5
		Technical prototype	The technical prototype was clearly presented with the results obtained through experiments	
	Oral exam	Technical prototype	The student shows good knowledge of technical prototype and it is clear that student has actively engaged in the development of prototype	0-5

Presentation and Oral exam

- Group presentation:
 - 15 minutes maximum
 - Make sure all parties participate in the presentation
 - No template, so you are free to bring your own. It is recommended to bring a copy on memory stick in case connection with projector does not work from one computer
- Group Questions and Answers for 5 minutes.
- Individual Oral exam: 10 minutes

Important notes for the technical report

- Students must upload the final version of their Technical report on Digital Exam by 19.12.
- Strictly follow the template provided on the Itslearning. Using a different template for the report will result in the rejection of report and automatic grade '00'.
- Strictly follow the page/words limits given for each template on Itslearning. Violation of page/words limits will result in the rejection of the section and possibly entire report. This will have negative impact on the grade or possibly rejection of entire report and automatic grade '00'.

Important notes for the pitch

- Students must upload the final version of their pitch on Digital Exam by 19.12.
- Revise the slides based on feedback you receive during the pitching session before final submission.
