

“Evaluation tool” by Simon Keel

Peer feedback

Lecture 5

Objectives

- The goal of this session is for students to learn that how they can continuously support each other during the course.
 - How to present your project work.
 - How to provide constructive feedback.

Instructions

- For this session groups shall come together to discuss the progress with each other and provide feedback.
- Based on the industrial challenge and the number of groups, the tables show how groups shall provide feedback. For example:
 - In case of double arrow $\Leftrightarrow$: Mission Grippossible 2 and ZOK shall discuss and provide feedback to each other on technical report and the assignment
 - In case of single arrow $\rightarrow$: Box Box 4, AscenD Robotics, and Maciek in the box™ shall discuss together, but provide feedback only to one other group.

Robotics		
Cloth Minds	$\Leftrightarrow$	Exo-suit
Los Pollos Hermanos	$\Leftrightarrow$	RoboSpool
MiRaculously Working	$\Leftrightarrow$	Navigation Solutions

Drones		
Box Box 4	$\rightarrow$	AscenD Robotics
AscenD Robotics	$\rightarrow$	Maciek in the box™
Maciek in the box™	$\rightarrow$	Box Box 4
Mission Grippossible 2	$\Leftrightarrow$	ZOK

Software		
holoSync	$\rightarrow$	We are Headset (WAH)
We are Headset (WAH)	$\rightarrow$	S-Holdet
S-Holdet	$\rightarrow$	holoSync
\$unshine	$\Leftrightarrow$	Team k8s
DAO's finest	$\Leftrightarrow$	Null Busters
Onbit	$\Leftrightarrow$	Team Dongu
a cool group name	$\Leftrightarrow$	Accessibility
Gate 4	$\Leftrightarrow$	GIM

Schedule

- 12:00 – 13:30 (30 minutes per group) Each group present their technical report and assignment to the other group. Do not make slides but just use the documents you have already prepared.
- 13:45 – 14:45 (20 minutes per group) Each group receives the feedback from their respective group as per grading criteria on the next slide.
- 15:00 – 16:00 (3 minutes per group) Each group verbally describe the experience of peer feedback. It was useful/not useful.

Grading criteria

	Criteria	Description	Score range
Technical report	Description of the industrial challenge	It is clear what is the industrial challenge and why it is important to solve this industrial challenge.	0-5
	State of the art	Report describes the most recent and relevant research and developments related to the industrial challenge with appropriate number of references.	
	Approach	Report clearly describes how the presented solution is different and better.	
	Experimental prototype	The experimental prototype is clearly described and it adequate for testing the approach.	
	Results	Reports clearly shows the completion of the experiment and provides measurable results from the experiments.	
	Summary	The report is well summarized in the Abstract. Conclusion clearly shows the success and shortcomings of the approach and describes the future direction.	

Scoring guide	
Description	Score
Missing	0
Not missing	1
Poor	2
Good	3
Very good	4
Excellent	5

Grading criteria

	Criteria	Description	Score range
Pitch	Innovativeness of the solution	Slides demonstrates the understanding of the topics and show clear connection with the industrial challenge	0-5
	Clarity of the business model		
	Market identification		
	Market assessment		
	Customer feedback		
	Competition identification		
	Business plan		
	Financial plan
